GammaLib - Action #1276

Convert TEX documents in doc/dev to RST and images from EPS to PNG

07/11/2014 05:29 PM - Deil Christoph

Status:	Rejected	**Start date:**	07/11/2014
Priority:	Low	**Due date:**	
Assigned To:	Deil Christoph	**% Done:**	0%
Category:		**Estimated time:**	0.00 hour
Target version:	1.0.0		

Description

There's still a bunch of of TEX documents and EPS images here:
https://github.com/gammalib/gammalib/tree/devel/doc/dev

This should be reformatted to RST pages and PNG images so that it becomes part of the visible GammaLib documentation online.
I can do the conversion, but before I spend time on this, Jürgen, could you have a quick look and comment if there are things that are outdated and can simply be removed?

History

#1 - 07/11/2014 05:30 PM - Deil Christoph

- Target version changed from 3rd coding sprint to 1.0.0

#2 - 10/31/2014 04:35 PM - Knödlseder Jürgen

Here some comments:

- doc/inst needs update but is an important document
- doc/math needs to be completed but is still very relevant
- doc/sdd can be removed
- doc/srs can be removed
- doc/tn is still relevant and contains important Mac OS X related information; probably needs update for newer Mac OS X versions

All these documents are relatively low-level, i.e. only for somebody who really digs deeply into GammaLib development. We may think about adding a subsection "Developer Manual" just below "User Manual" in the documentation and organise these documents under this subsection.

#3 - 06/30/2015 12:41 PM - Kelley-Hoskins Nathan

- File clean.rst.file.py added

(ignore this comment/script, they were meant for bug 572)

#4 - 06/30/2015 12:48 PM - Knödlseder Jürgen

- Status changed from New to Rejected

- Remaining (hours) set to 0.0

We agreed not to remove the remaining TeX documentation for the time being.
