

GammaLib - Change request #1294

Allow switching off of error computation in optimizer

07/24/2014 09:04 AM - Knödseder Jürgen

Status: Closed	Start date: 07/24/2014
Priority: Normal	Due date:

Target version:	
Description There are use cases where error computation is not needed in the optimizer (e.g. TS computation). One should be able to switch error computation off, or to request errors explicitly after an optimization step (maybe better solution).

This duplicates #1328 and has been solved by separating the error computation from the optimization.
