<b>Target version:</b>	00-09-00		
<b>Description</b> <p>The GCsv class implements for the moment only methods for reading. Methods should be added for creating a table and saving the table to the ASCII file. Here a list of constructor and the methods that should be implemented:</p> <p>GCsv(const int&amp; nrows, const int&amp; ncols); void string(const int&amp; row, const int&amp; col, const std::string&amp; value); void real(const int&amp; row, const int&amp; col, const double&amp; value); void integer(const int&amp; row, const int&amp; col, const int&amp; value); void save(const std::string&amp; filename, const std::string&amp; sep = " ", const bool&amp; clobber = false) const;</p>			

History
