Target version:	00-09-00		

Description

The GCsv class implements for the moment only methods for reading. Methods should be added for creating a table and saving the table to the ASCII file. Here a list of constructor and the methods that should be implemented:

```
GCsv(const int& nrows, const int& ncols);  
void string(const int& row, const int& col, const std::string& value);  
void real(const int& row, const int& col, const double& value);  
void integer(const int& row, const int& col, const int& value);  
void save(const std::string& filename, const std::string& sep = " ", const bool& clobber = false) const;
```

History

#1 - 10/26/2014 10:03 PM - Knödseder Jürgen

- Status changed from *In Progress* to *Closed*
- % Done changed from 0 to 100

Merge into devel branch.
