## GammaLib - Feature #1517

# Add support for Fermi/LAT Pass 8 response functions

07/24/2015 09:12 PM - Knödlseder Jürgen

Status:	Closed	Start date:	07/24/2015	
Priority:	Normal	Due date:

Description				
The Fermi/LAT da	ta have been switched to Pass 8, hen	ce we need now also to support	Pass 8 in GammaLib.	
I created a branch	lat-pass8 for that and started by addi	ng a Pace 9 toot data cot and Pa	a 9 response functions to the (	
directory.	ng Pass 8 support, through, is still ah	-		JALDB

### History

#### #1 - 07/24/2015 09:35 PM - Knödlseder Jürgen

One of the things that should be done is using the GCaldb for response access. The response is now becoming more complicated and we can't construct anymore directly the filenames in a simple way. There exists already an issue for that: #293.

Another thing that is needed is to split the front/back handling in a general handling of several response types. For example, Pass 8 now has 4 PSF response types. There is issue #1518 for that.

#### #2 - 07/24/2015 09:36 PM - Knödlseder Jürgen

- Assigned To set to Knödlseder Jürgen

#### #3 - 10/13/2017 10:49 PM - Knödlseder Jürgen

- Status changed from In Progress to Closed
