Description

Christoph noted that cshessobs doesn't work with Python3.x. The reason is that apparently python dictionaries lost the function has_key.
I therefore propose to replace the call of these functions to a more pythonic way using:

if key in dict:

instead of

if dict.has_key(key):

(IMO having cshessobs as an untested and undocumented second-class script that hardcodes HESS a data management scheme is a bad idea.)
