Description

Hello, Juergen Knoedlseder.

I'm Tan from Ibaraki University, Japan.
When installing Gammalib-0.11.0 by this following commands:

    $ ./configure
    $ make
    $ make check (All 20 tests passed)
    $ su
    (type password)
    $ make install

, I got the error (also see the attachment for details) after "make install", as followings:

    IOError: [Errno 13] Permission denied: 'gammalib/__init__.py'

?I think that the permission was denied when creating the *init*.py in the directory gammalib/ .
I also used "$ sudo make install" but it does not change.

Is there something wrong ?
Thank you for reading.

History

#1 - 11/06/2015 08:17 AM - Knödlseder Jürgen

- Project changed from ctools to GammaLib

#2 - 11/06/2015 09:10 AM - Knödlseder Jürgen

- Status changed from New to Feedback

- Assigned To set to Knödlseder Jürgen

- % Done changed from 0 to 90

I removed the creation of the __init__.py file during the install step. I hope that this fixes your problem. Could you please check.

Thank you.
So where can I get the new file for install? From git repository?

#4 - 11/06/2015 10:42 AM - Knödlseder Jürgen
