GammaLib - Change request #1612

Remove Python include directory during C++ compilation

01/04/2016 05:45 PM - Knödlseder Jürgen

Status:	Closed	**Start date:**	01/04/2016
Priority:	Normal	**Due date:**

Category:		**Estimated time:**	0.00 hour
Target version:			

Description

It seems that the Python include directory is in the path during compilation of C++ code, this should not be needed (and may create issues with including the wrong stuff):

/bin/sh ../../libtool --tag=CXX   --mode=compile g++ -DHAVE_CONFIG_H -I. -I../.. -I../../include -I../../src -I../../src/support -I/System/Library/Frameworks/Python.framework/Versions/2.7/include/python2.7 -g -O2 -c -o GInstDir.lo GInstDir.cpp

(in this case the /System/Library/Frameworks/Python.framework/Versions/2.7/include/python2.7 directive).

It should be checked whether it's possible to remove that directive, and if yes, to remove it.

History
