Description

Dear the system admin

Hi, my name is Tan. I have a question.
How can I output TS value of ctlike by python code? I've found on ctools homepage but there's no clear answer.

Thank you for reading me.
Tan

History

- Tracker changed from Feature to Support

- Subject changed from how to output TS value of ctllike to How to output TS value of ctllike

- Status changed from New to Feedback

- Assigned To set to Knödlseder Jürgen

- % Done changed from 0 to 100

Use the GModel::ts() method, e.g.

```
ctlike = ctools.ctlike()
...
ctlike.run()
models = ctlike.obs().models()
for model in models:
    if model.has_ts():
        print("Model %s has TS %.3f" % (model.name(), model.ts()))
```
