| Category: | | Estimated time: | 0.00 hour |
| Target version: | 1.1.0 | | |
| <p>Description</p> <p>A GCTAObservation filename constructor should be added to allow loading of a file upon construction.</p> <p>For the moment, the GCTAObservation(const std::string& instrument) constructor is used for the registry. The constructor should be modified, for example by adding a dummy argument</p> <p>GCTAObservation(const bool& dummy, const std::string& instrument)</p> <p>so that the registry globals can be modified to</p> <pre>const GCTAObservation g_obs_cta_seed("CTA"); const GCTAObservation g_obs_hess_seed("HESS"); const GCTAObservation g_obs_magic_seed("MAGIC"); const GCTAObservation g_obs_veritas_seed("VERITAS");</pre> <p>and we have freedom to build a filename constructor.</p> | | | |

History

#1 - 03/16/2016 10:02 PM - Knödlseider Jürgen

- Status changed from New to Feedback
- Assigned To set to Knödlseider Jürgen
- Target version set to 1.1.0
- % Done changed from 0 to 100

Done.

#2 - 03/16/2016 10:02 PM - Knödlseider Jürgen

- Status changed from Feedback to Closed
