

GammaLib - Bug #1806

Example programs do not compile on Mac OS X because pkg-config is not found

06/23/2016 04:04 PM - Knödlseider Jürgen

| <b>Target version:</b>   | 1.1.0              |                        |            |
| <b>Description</b>   |                    |                        |            |
| The example scripts do not compile on Mac OS X because pkg-config is not installed by default on that system. Earlier there was a version of the Makefile that did not depend on pkg-config, and the code should revert to version that does not rely on pkg-config. |                    |                        |            |

History

#1 - 06/24/2016 03:07 PM - Knödlseider Jürgen

- Subject changed from *Example scripts do not compile on Mac OS X because pkg-config is not found* to *Example programs do not compile on Mac OS X because pkg-config is not found*
- Status changed from *New* to *In Progress*
- % Done changed from *0* to *90*

The Makefile for the example programs are now generated by automake, and they are actually build when make is typed. This includes the building of the programs in the continuous integration testing.

#2 - 06/24/2016 04:05 PM - Knödlseider Jürgen

- Status changed from *In Progress* to *Closed*
- % Done changed from *90* to *100*

Merged into devel
