

## ctools - Change request #1814

### Edisp cube should be queried before background cube

07/01/2016 11:02 AM - Mayer Michael

#### Description

For the moment, the IRFs usually follow a specific order in ctools: Aeff, PSF, Edisp, background

A recent change in `ctool::set_obs_response()` however, leads to a change of the querying order (background and edisp are flipped). Therefore, currently all ctools query first the background cube and then the edisp cube (in case `edisp=yes`) was provided. I propose to change the logic and query for the edisp cube before the background, in order to be consistent with the internal ordering.

#### History

##### #1 - 07/01/2016 12:15 PM - Knödseder Jürgen

- Status changed from New to Closed
- Assigned To set to Knödseder Jürgen
- Target version set to 1.1.0
- % Done changed from 0 to 100

Implemented.
