

## GammaLib - Change request #1847

### Remove eval\_gradients() methods

<b>Target version:</b>	1.2.0		
<b>Description</b>			
The eval_gradients() methods duplicate a lot of the code from the eval() methods. To avoid code duplication, a hidden gradients flag should be added to the eval() method, and if the flag is set to true, gradients should be computed. By default, the flag should be set to false.
