

GammaLib - Change request #1923

Allow setting of time reference in GCTACubeExposure

02/03/2017 01:59 PM - Knödlseider Jürgen

Status:	New	Start date:	02/03/2017
Priority:	Normal	Due date:	
Assigned To:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
The time reference for the GGti member can not be set explicitly, which means that the GammaLib internal reference time is used when writing the exposure cube. It should be possible to explicitly set the reference time of GCTACubeExposure. We may also consider using the reference time of the first event list that is used for filling.			

History

#1 - 02/03/2017 02:05 PM - Knödlseider Jürgen

- Subject changed from Allow setting of time reference in @GCTACubeExposure@ to Allow setting of time reference in GCTACubeExposure
