

GammaLib - Bug #1931

Length of test filename too long

02/23/2017 11:19 AM - Knödseder Jürgen

Status: Closed	Start date: 02/23/2017
Priority: Urgent	Due date:
Assigned To: Knödseder Jürgen	% Done: 100%
Category:	Estimated time: 0.00 hour
Target version: 1.2.0	

Description

On UNIX, the length of the test filenames seems to be too long:

```
tardir=gammalib-1.2.0.dev1 && /bin/sh /home/jenkins/jenkins/workspace/gammalib-release-os/label/centos6_64/missing --run tar chof - "$stardir" | GZIP=-best gzip -c >gammalib-1.2.0.dev1.tar.gz
tar: gammalib-1.2.0.dev1/inst/lat/caldb/data/glast/lat/bcf/edisp/edisp_P8R2_TRANSIENT100S_V6_EDISP.fits.gz : le nom de fichier est trop long (99 max) ; fichier non archivé
tar: gammalib-1.2.0.dev1/inst/lat/caldb/data/glast/lat/bcf/edisp/edisp_P8R2_ULTRACLEANVETO_V6_EDISP.fits.gz : le nom de fichier est trop long (99 max) ; fichier non archivé
...
```

History

#1 - 02/23/2017 11:21 AM - Knödseder Jürgen

Now I remember: this happens only for dev since for normal versions without dev the filenames are shorter.

#2 - 02/23/2017 12:45 PM - Knödseder Jürgen

- Status changed from New to Closed

- % Done changed from 0 to 100

I unzipped a number of files which shortened their filenames, passing the 99 character limit. Merged into devel.
