

GammaLib - Change request #1969

Do no longer interpret a CTA calibration database as a file path in GCTAResponseIrf

03/17/2017 12:11 PM - Knödseder Jürgen

Status:	Closed	Start date:	03/17/2017
Priority:	Normal	Due date:	
Assigned To:	Knödseder Jürgen	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	1.3.0		
Description			
The GCTAResponseIrf::read method tries to interpret the calibration database as a file path, and only if the file path does not exist opens the CALDB directory. This should no longer be allowed since it prevents using a calibration database in case that a folder with the same name exists.
