#### Description

The model

results in

and when it's written out the GLON and GLAT parameters are transformed into Right Ascension and Declination. While the conversion is done correctly, the names of the parameters should be changed to RA and DEC.

#### History

#1 - 05/14/2017 08:51 PM - Knödlseder Jürgen

- *Status changed from New to Closed*

- *% Done changed from 0 to 100*

Now the names are changed to RA and DEC upon reading. Merged into devel.
