

GammaLib - Action #2210

Implement ARF integration in CTAROnOffObservation

10/09/2017 03:32 PM - Knödlseider Jürgen

Status:	Closed	Start date:	10/09/2017
Priority:	Normal	Due date:	
Assigned To:	Martin Pierrick	% Done:	100%
Category:		Estimated time:	10.00 hours
Target version:	1.5.0		
Description			

History

#1 - 10/09/2017 03:36 PM - Knödlseider Jürgen

- Assigned To set to Martin Pierrick

#2 - 10/11/2017 09:00 PM - Knödlseider Jürgen

- Subject changed from Implement ARF integration in @CTAROnOffObservation@ to Implement ARF integration in CTAROnOffObservation

#3 - 10/13/2017 09:25 AM - Martin Pierrick

- File test_OnOff_8th.py added

Integration of ARF, RMF, and BGD over the ON-OFF regions should now be done properly. But there are still some bugs in the code because the attached self-contained test script for a simple reflected region case does not yield the expected output.

#4 - 10/13/2017 09:25 AM - Martin Pierrick

- % Done changed from 0 to 50

- Estimated time set to 10.00

#5 - 10/13/2017 10:47 PM - Knödlseider Jürgen

- Status changed from New to Feedback

- Target version set to 1.5.0

- % Done changed from 50 to 90

I integrated the code into GammaLib and did some minor bug fixes. From my perspective the code is okay.

I put the status to feedback in case you want to double check.

#6 - 10/16/2017 01:29 PM - Martin Pierrick

I found out that I made a mistake in the way I handled the RMF for the computation of the expected ON counts, and then realized that I should have done a proper integration over the bin width instead of using the log-mean value. Apparently you did correct these two points in the new version so everything should work fine now. I will test it with my script and let you know.

#7 - 10/30/2017 10:35 PM - Knödlseider Jürgen

- Status changed from Feedback to Closed

- % Done changed from 90 to 100
