Description

Some users suggest to make available the ctools documentation as a pdf. This seems straightforward to do using sphynx
https://docs.typo3.org/typo3cms/extensions/sphinx/AdvancedUsersManual/RenderingPdf/Index.html
The pdf could be added to the downloadable material on the website and included in the conda releases.

History

The link gives "Page not found (404)". Could you check how to generate a pdf file?

#2 - 07/15/2020 08:29 PM - Tibaldo Luigi

On the official sphinx documentation they say all you need to do is running
make latexpdf
https://www.sphinx-doc.org/en/1.5/tutorial.html#running-the-build

#3 - 07/15/2020 09:24 PM - Knödlseder Jürgen

- Target version set to 2.0.0

Thanks for the link. I think it's a bit more complicated, see https://www.sphinx-doc.org/en/1.5/builders.html#builders. Sphinx has only a latex builder, but it requires some setup of the system. A post-processing is then needed to generate a pdf file.

Let's work on that for the release 1.8.0, I try to fix the urgent things for 1.7.0.

Sounds good, I can look into it myself next fall
