Target version:			
Description			
For the moment, the package build and check steps			
\$ make pkg			
\$ make pkgcheck			
do not work on Mac OS X 10.13 and 10.14, I hence disabled them for the moment in the release pipeline. It seems that the step			
hdiutil create -volname \$CTOOLS \			
-srcfolder \$PRODDIR/\$CTOOLS.pkg \			
-srcfolder \$PRODDIR/License.txt \			
-srcfolder \$PRODDIR/ReadMe.txt \			
\$DMGFILE			
hangs.
