GammaLib - Bug #3097

Error in ctobssim execution

12/10/2019 07:01 PM - Acharyya Atreya

Status:	Rejected	**Start date:**	12/10/2019
Priority:	High	**Due date:**	
Assigned To:		**% Done:**	100%
Category:		**Estimated time:**	0.00 hour
Target version:			

Description

I am getting the fiollowing eroor for obssim.execute():

Traceback (most recent call last):
File "pl_simulations.py", line 79, in <module>
obssim.execute()
File "/usr/local/gamma/lib/python2.7/site-packages/ctools/tools.py", line 843, in execute
return _tools.ctool_execute(self)
ValueError: *** ERROR in GCTAResponseTable::table(std::string&): Invalid value. Table "BGD" not found. Please verify the response table.

Not sure what it means...I think it maybe due to my choice of Irfs, I haven't used prod3b-v2 before
Have attached code used so far
Thanks in advance

Which version of ctools are you using? There was a name change, but recent ctools versions can cope with that. I guess that upgrading ctools will fix the issue.

Thanks I can confirm that for some reason my code was using a previous version of ctools and the matter is now resolved. Thanks Jurgen
