

GammaLib - Action #349

Allow access of ASCII performance file through XML observations interface

07/20/2012 05:09 PM - Knödlseider Jürgen

Status:	Rejected	Start date:	07/20/2012
Priority:	Normal	Due date:	
Assigned To:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Stage Jean-Baptiste Cayrou		
Description So far the ASCII performance files cannot be accessed via the XML observation interface. This should be changed, although we know that the ASCII files are still preliminary. Ideally, supplying the filename of an ASCII performance file to the ARF or PSF entries in the XML file should automatically load the relevant information, and act as if we would deal with an IRF file.
