GammaLib - Feature #39

Assure consistency of FITS column operations

02/20/2012 05:46 PM - Knödlseder Jürgen

Status:	New	**Start date:**	02/20/2012
Priority:	Low	**Due date:**	
Assigned To:		**% Done:**	0%
Category:		**Estimated time:**	0.00 hour
Target version:			

Description

It is not clear whether header / data consistency is actually maintained in FITS file column operations.

It should be checked whether this is actually the case, and if not, the code should be modified to guarantee the consistency.

Note that the m_column member in GFitsTableCol is used to flag the presence of a column in the FITS file (see the header description).

History

#1 - 02/20/2012 06:07 PM - Knödlseder Jürgen

- Subject changed from Assure consistency if FITS column operations to Assure consistency of FITS column operations

- Priority changed from Normal to Low
