Description			
The Mac OS X binary build fails with the following message:			
java.io.IOException: remote file operation failed: /Users/jenkins/jenkins/workspace/ctools-cr-osx at hudson.remoting.Channel@54e7e181:Mac OS 10.11: java.nio.file.AccessDeniedException:			
It turned out that the ctools.egg-info directory in the ctools-cr-osx is owned by root while all other files are owned by jenkins:

- % Done changed from 0 to 10

Running

```
$ sudo chown -R jenkins pkg_build/src/ctools-2.1.0.dev/pyext/ctools.egg-info
```

fixed the issue, hence I may try to add this command to Jenkins.

#2 - 03/27/2023 05:59 PM - Knödseder Jürgen

- Status changed from New to Feedback
