

GammaLib - Action #569

Feature # 536 (Closed): Add HESS instrument response functions

Add acceptance reader

10/15/2012 04:09 PM - Knödlseider Jürgen

Status:	New	Start date:	10/10/2012
Priority:	Normal	Due date:	
Assigned To:	Knödlseider Jürgen	% Done:	0%
Category:		Estimated time:	8.00 hours
Target version:			
Description The HESS acceptance (background shape and spectrum), should be implemented using a map cube. The MapCube model type (implemented by GModelSpatialCube) can be used to realize this model. We have to introduce a model GCTAModelAcceptance that allows specifying a GModelSpatialCube as background model.			

History

#1 - 10/15/2012 04:14 PM - Knödlseider Jürgen

- Description updated

#2 - 10/03/2013 02:34 PM - Knödlseider Jürgen

See issue #576 for more discussions about the background model (eventually, this feature is obsolete?)

#3 - 11/03/2013 02:09 AM - Knödlseider Jürgen

- Target version deleted (HESS sprint #1)
