Target version:			
Description			
As discussed in issue #566 we want to distribute gmmalib via package managers. Homebrew (http://mxcl.github.com/homebrew/) is one of the three common package managers on Mac, I'll add gmmalib to it.			
Once this is done I will document it here: https://cta-redmine.irap.omp.eu/projects/gmmalib/wiki/Deployment
