

GammaLib - Feature #582

Distribute gammalib for Macs via the Fink package manager

10/31/2012 05:28 PM - Deil Christoph

Status:	Closed	Start date:	10/31/2012

Target version:			
Description As discussed in issue #566 we want to distribute gammalib via package managers. Fink (http://www.finkproject.org) is one of the three common package managers on Mac, I'll add gammalib to it. Once this is done I will document it here: https://cta-redmine.irap.omp.eu/projects/gammalib/wiki/Deployment

I investigated and tried out Fink and found it inferior to Macports in every way. I think it's slowly dying (judging from it's outdated packages and documentation). Here's some more comments why I think we shouldn't even put gammalib in and mention Fink to Mac users:
