

GammaLib - Feature #591

Investigate how GammaLib can be made VO compliant.

11/14/2012 10:13 AM - Knödlseeder Jürgen

Status:	In Progress	Start date:	02/20/2013
Priority:	Urgent	Due date:	03/29/2015
Assigned To:		% Done:	76%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
Ultimately, GammaLib should be VO compliant.			
It should be possible to access event data through a VO compliant interface. Also observations should be defined in a VO compliant format.			
GammaLib results, such as images, spectra, should also be VO compliant. For example, it should be possible to visualize spectra using VOspec.			
An investigation should be conducted on how VO compliance can be achieved. An inventory of tools and interfaces is needed, to define what exactly should be implemented.			
Subtasks:			
Action # 780: Display skymap using Aladdin			Closed
Action # 781: Design SAMP usage in GammaLib			Closed
Action # 1170: Add object to coordinate transformation using VO services to GSkyDir			New
Action # 1229: Design and implement GVOHub class			Closed
Action # 1231: Design and implement GVOTable class			In Progress

History

- Description updated

#2 - 02/20/2013 11:29 AM - Knödlseeder Jürgen

A possible Use Case to start with would be the display of a skymap by Aladdin using the SAMP protocol. Aladdin can be used as a FITS map display tool using the SAMP protocol. Expertise on this topic exists apparently at the CDPP (IRAP).

#3 - 03/11/2013 10:31 PM - Knödlseeder Jürgen

We need first an implementation of the XML RPC protocol: <http://en.wikipedia.org/wiki/XML-RPC>. See further: <http://xmlrpc.scripting.com/>.

Here some links about sending http information:

- <http://www.dreamincode.net/forums/topic/29771-http-sockets-with-recv/>
