The GModelPointSource, GModelExtendedSource and GModelDiffuseSource classes have been removed, and GModelSky has been made non-abstract. The GModelSky class has been modified to provide the same functionality than the former GModelPointSource, GModelExtendedSource and GModelDiffuseSource classes. The unit test has also been adapted, and all tests are successful.

We still need to verify all scripts to see whether any of those make use of the removed classes.
