

GammaLib - Bug #937

Warnings with autotools 1.14

06/28/2013 03:15 PM - Deil Christoph

Status: Closed	Start date: 06/28/2013
Priority: Low	Due date:

Target version:	
Description My package manager (Macports on Mac) upgraded to autotools 1.14 and now I get many warnings from ./autogen.sh: https://gist.github.com/cdeil/5884553 The configure and make seems to work fine though, so it's a cosmetic issue.	

History

#1 - 06/28/2013 03:15 PM - Deil Christoph

- Subject changed from *Errors with autotools 1.14* to *Warnings with autotools 1.14*

#2 - 10/31/2013 11:55 PM - Knödlseher Jürgen

- Status changed from *New* to *Feedback*

autotools is indeed still evolving, but as long as it just issues warnings there is no problem with this. I tried in the past to remove warnings, but this basically broke backwards compatibility. I thus propose to close this issue.
