

## **ctools 00-04-00 release**

The purpose of the ctools 00-04-00 release is to provide a software version that is adapted to the analysis of CTA 1DC data.

The following changes have been implemented:

- Add handling of observation definition XML files to ctselect
- Add handling of observation definition XML files to ctbin
- Add handling of observation definition XML files to ctlike
- Add deadtime correction factor to ctobssim
- No longer query output parameters first
- Remove method parameter from ctlike
- Replace evfile and cntmap parameters by infile parameter in ctlike
- Add configure options for Mac OSX universal builds
- Remove automake dependency tracking
- Improve building of Python bindings
